

Ane stool

by
**troy
backhouse**

Ane stool is a solid timber stool with a powder coated steel frame. The seat is formed through the unique use of multiple pieces of one shape of wood positioned and cut in a dynamic way. The simple placement of three geometric circles allows the Ane timber stool to be cut in a way to give the appearance of a complex furniture piece. A perfect option for a timber cafe stool to compliment timber or other fitouts.

ane is a Scottish word - used of a single unit or thing;
